

STONDECK COLOUR CHART

STONDECK

STONDECK PARKING DECK SYSTEMS – First Impressions Count...

StonDeck car park protection systems have been designed to meet contemporary requirements for upmarket car park environments, helping to enhance visual appearance, improve light reflectivity, reduce noise from tire squeal and prevent water ingress into the concrete structure.

Car parks, like no other structures, are subject to unique conditions which demand systems proven beyond doubt in the protection of multi-storey environments that are subject to multi-traffic movement.

STONDECK RAPIDE ID

StonDeck Rapide ID is a solvent-free, methyl methacrylate-based flexible interior coating system which provides a crack bridging, waterproof, long-wearing surface for use over indoor decks, heated parking garages and walkways.

STONDECK RAPIDE ED

StonDeck Rapide ED is a solvent-free methyl methacrylate and polyurethane hybrid (PUMMA) flexible exterior deck coating system which provides crack bridging, waterproof, long-wearing surface use over outdoor decks, parking garages and walkways.

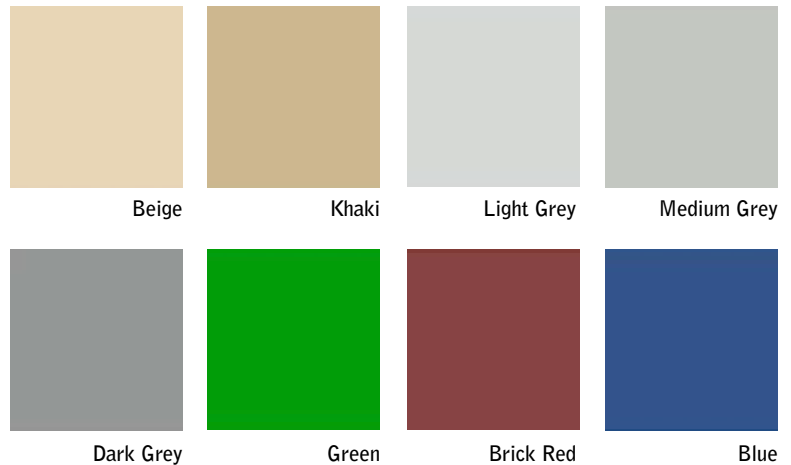

STONDECK ID

StonDeck ID is a flexible solvent-free polyurethane car park deck coating system which provides a crack bridging, waterproof, noise-reducing wearing surface for intermediate decks of multi-storey car parks.

Colour reproductions are as accurate as modern photography and quality printing methods can produce. For actual colour, see product sample.
